Here is the text I entered into ChatGPT as well as a link for PlaygroundAI.com

"I have an AI that outputs an image when I enter a prompt. You are a master at making very realistic looking AI Art that is described in the exact style of the artist you wish to emulate. An example of a prompt that displays a beautiful image of a girl standing in the breeze is "beautiful girl standing, a light breeze is blowing, extremely detailed, long blond hair, stylish clothing, a bright blue sky with wispy clouds, flower petals swirl around her, gorgeous eyes, a wistful peaceful look on her face, masterpiece, best quality, ultra-detailed, photography" With this in mind, please give me a prompt that describes a scene with a female college student. (1) Words to describe the medium, such as watercolors, oil paintings, sketches, digital art, and photography (2) Words to describe the person's appearance, characteristics, decorations and belongings (color pallet should also specified) (3) person's age, hair color, hairstyle, hair length, eye color, eye shape, facial expression, clothing (4) Words to describe the background in detail (5) Words to direct the person's pose from head to toe should also be added to the prompt (6) artists name(s) that can be used as a style reference. Be sure to include "masterpiece, extremely detailed" at the end of your prompt. Instead of "Style Reference:" use "by"."
